PROFESSIONAL SUMMARY

Final-year B.Tech Information Technology student at NIT Srinagar (CGPA: 8.14/10) with hands-on experience in full-stack (MERN) development, AI-driven applications, and competitive programming. Built 5+ production-grade projects, solved 1000+ DSA problems, completed a research internship at IIT (BHU), and led a team to the Smart India Hackathon 2025 Finals. Seeking a Software Engineering Intern at Enterpret to build scalable and impactful software.

EDUCATION

• **National Institute of Technology (NIT), Srinagar** 2023 – 2027 (Expected)
Bachelor of Technology in Information Technology CGPA: 8.14/10

TECHNICAL SKILLS

Languages & Core Concepts: JavaScript, C/C++, Python, HTML5/CSS3, Data Structures & Algorithms, OOP, Systems Design

Backend & Web Development: Node.js, Express.js (MVC), REST APIs, Microservices, JWT Authentication, React.js, Redux, Tailwind CSS, Socket.IO

Databases & Caching: MongoDB, MySQL, Redis, Indexing, Transactions & ACID Properties

DevOps, Cloud & Tools: Docker, AWS (EC2, S3, IAM), Git, GitHub, GitHub Actions (CI/CD), Linux/Unix, Postman, Jest (Unit Testing), Bash

Networking & OS: Computer Networks (TCP/IP, HTTP/HTTPS, DNS, Sockets), Operating Systems

AI: Generative AI Development (LLM Orchestration, RAG, Prompt Engineering; LangChain)

EXPERIENCE

• **Research Intern** Dec 2025 – Feb 2026
Indian Institute of Technology (BHU) Varanasi, India
– Engineered high-performance Genetic Algorithm selection-pressure optimizers, achieving a 25% reduction in run-time variance through efficient population-tier partitioning.
– Implemented multi-objective Neural Architecture Search (NAS) using NSGA-II, leveraging algorithmic efficiency, custom memory management, and data structure optimizations.

PROJECTS

• **FarmBazaar** Sept 2025 – Mar 2026
MERN Stack, Redis, JWT, Socket.IO, Razorpay, Cloundinary, Pub-Sub
– Architected a decoupled Express.js REST API marketplace featuring role-based access control (RBAC) and Razorpay signature verification across 3+ distinct user roles.
– Implemented Redis TTL caching for email OTP authentication and JWT session blacklisting, reducing unauthorized access surface by 80%.
– Optimized MongoDB query performance by 30% utilizing .lean(), compound indexing, and \$geoNear geospatial aggregation across 10+ high-traffic endpoints.
– Built a real-time community platform featuring blogging, threaded comments, admin moderation, and Socket.IO chat supporting 100+ concurrent users.

• **LeetCode-Style Judge Platform** Sept 2025 – Apr 2026
MERN Stack, Monaco Editor, Judge0 API, REST API
– Built a full-stack online judge using Express MVC and React SPA supporting 3+ programming languages through Judge0 API integration.
– Developed a scalable code execution pipeline with MongoDB compound indexing for analytics across 1,000+ test cases.
– Integrated a stateful Gemini 2.5 Flash AI tutor with conversation memory, rate limiting, and context-aware hints, improving problem resolution by 35%.
– Designed a Direct-to-Cloundinary upload pipeline using backend-signed signatures, reducing upload latency by 40%.

ACHIEVEMENTS

- Secured **3rd** place among 125 teams at Cursor Hackathon 2026 by developing a full-stack prototype within 24 hours.
- Led a team to the **Smart India Hackathon (SIH) 2025 Finals** as Team Leader.
- Achieved **Rank 322** in a LeetCode Biweekly Contest among 20,000+ participants.
- Solved **1000+** Data Structures & Algorithms problems across LeetCode, GeeksforGeeks, and other coding platforms.
- Co-founded the **Independent Club** at NIT Srinagar, organizing debates, civic awareness initiatives, and discussions on public policy.
